EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Abeyta on 3-17-2004 and 3-18-2004.

The application has been amended as follows: In claim 4, the "2" was replaced with --3--.

In claims 7 and 23, the word "a" before "working" was deleted and replaced with --the--.

2. The following is an examiner's statement of reasons for allowance: The closest prior art to that of the instant invention is Holmstrom, Warburton, and Taylor, which all teach monitoring the operation of an amperometric gas sensor. None of the prior art teach the claimed method of claims 1 and 16 where the reference electrode voltage is measured at first and second current levels and the optimum electrode bias is calculated from the reference electrode voltage. The prior art also does not teach a system for an oxygen probe that comprises measurement and calculating mechanisms for performing said functions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
